Passionate software engineer skilled in full-stack web development and cloud technologies. Proven success in project delivery and technical training, with a passion for embracing new technologies and contributing to organizational growth.

PROFESSIONAL EXPERIENCE

Formation   **Remote**
Software Engineering Fellow   *March 2023–Present*

- Selected for highly-competitive Fellowship for personalized coaching from top-tier software engineers.
- Fixed bugs and implemented new production-ready features in a large code base.
- Studied system design fundamentals in small groups led by senior engineers from top companies, comparing and contrasting concepts in modern web-based applications.

KSB Consulting Inc.   **San Dimas, CA**
Software Engineer   *October 2022–Present*

- Developed training materials and conducted live sessions for medical software clients, enhancing their ability to conduct audits efficiently and reducing support requests by 25%.
- Collaborated with clients through email correspondence to address user issues and improve software based on their feedback.
- Redesigned and implemented KSB's marketing website using a modern tech stack including Next.js, .NET, SQL Server, and Microsoft Azure, resulting in an improved online presence.

Bistro Studios   **Azusa, CA**
Web Developer   *September 2020-June 2021*

- Trained staff on Headless CMS systems, enabling the team to expand their service offerings and adapt to industry trends.
- Coordinated and led the development of Bistro Studios' marketing website redesign, increasing site traffic by 35%.
- Designed a user-friendly website for a client using Gatsby and React, integrated WordPress as the CMS, and utilized webhooks to ensure seamless deployment updates.
