PROFESSIONAL EXPERIENCE

KSB Consulting Inc.
Software Engineer

San Dimas, CA
October 2022 -

- Lead development and enhancement of enterprise healthcare platforms supporting compliance tracking, provider training, audit management, and reporting workflows.
- Build and maintain full-stack applications using ASP.NET Core, SQL Server, JavaScript, React, REST APIs, IIS, and AWS-hosted infrastructure.
- Partner with clients, leadership, and technical teams to define requirements, scope features, and deliver scalable software solutions across multiple organizations.
- Designed and implemented API and automated data exchange workflows that improved reporting accuracy and reduced operational workload by approximately 60%.
- Led implementation of Twilio-based two-factor authentication (2FA) and role-based access control enhancements to strengthen platform security.
- Own projects end-to-end from planning and database design through implementation, deployment, support, and iteration in production environments.
- Create technical documentation, onboarding resources, and workflow improvements that reduced support requests by approximately 30%.

Bistro Studios
Web Developer

Azusa, CA
September 2020- June 2021

- Trained staff on Headless CMS systems, including WordPress and Contentful, improving internal content management workflows and expanding service offerings alongside industry trends.
- Coordinated and led the redesign of the company's marketing website using React and SASS, resulting in a 35% increase in site traffic and enhancing user experience.
- Built and optimized client-facing web applications using Gatsby, GraphQL, React, and WordPress as a headless CMS. Supported deployment workflows, version control, and automated updates using Git and webhooks.

SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript, C#, Python, React.js, Next.js, ASP.NET Core, VB.NET, HTML, CSS, Tailwind CSS
- **Backend & APIs:** REST APIs, LINQ, API Integrations
- **Databases & Data:** SQL Server, Database Design, Data Processing, Reporting Automation
- **Cloud & Infrastructure:** AWS, Microsoft Azure, IIS, CI/CD Workflows, Git
